

Field Test Data

2012 Monty's Research Farm Discovery #2

Monty's Research Farm located in Shelby County, Ky on the farm of Paul Hornback, conducted trials this 2012 season. In the data above the AH stands for Monty's Agri-Hance V a foliar spray that enhances the growth and energy in the crop applied to. Agri-sweet is also a foliar spray, Nanobind is a Monty's product we used in the row on the seed for this trial.

The 1st trial is a 13% increase in yield over the control. The second trial is a 16% increase in yield over the control. These kind of trials help support Monty's suggestion of our products being a management tool for controlling your crops response to stresses during the growing season.

Gary Coughlin – Monty's Plant Food – Research Farm Manager

Joe Dedman – VP of Agronomy for Monty's Plant Food Co.
