PRODUCT DESCRIPTION

Microhance offers a unique blend of Monty's technology designed to provide nutrients to the plant at any stage of growth, helping maximize the plant's yield potential.

DIRECTIONS FOR USE

Monty's Microhance may be applied in water, liquid fertilizers and suspensions, or with most pesticides. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed and the application method. Monty's recommends first taking a soil test or plant tissue test, and having a qualified lab analyze the samples to determine micronutrient levels in your soil or plant, then follow recommended applications. Application guidelines for one growing season in the absence of a soil test or plant tissue test: 1 to 2 liters per hectare.

Manufacturer by:
Monty's Plant Food Company
4800 Strawberry Lane
Louisville, KY 40209 USA
