

# MAGMAHUME™

## Plant and Soil Fortifier

**MagmaHume** is a unique combination of basalt, a source of secondary and micronutrients, and Monty's proprietary activated humics, to improve soil fertility and health. MagmaHume is natural, organic, and balanced for better growth, bringing more energy to your plants.

- Dual-action soil and plant fortifier
- Key nutrients assist in photosynthesis, enzyme production, catalyzing key plant processes, and support plant strength
- Improves overall soil health by reducing compaction, enhancing micronutrient uptake, and increasing microbial activity
- Ideal for silica and nutrient-demanding crops like rice, sugar cane, wheat, small grains, corn, hemp, soybeans, and tomatoes
- Pelleted product is uniformly sized, low-dust, and easy to spread
- Basalt processed to maximize surface area interaction with activated humics, increasing nutrient solubility
- Blendable and compatible with other dry inputs
- OMRI Listed and approved for organic application

Available in 50 and 2,000 lb sizes. For more information, contact your Monty's representative, dealer, or visit [www.montysplantfood.com](http://www.montysplantfood.com).

### ACTIVE INGREDIENTS

Calcium (Ca) .....	2%
Magnesium (Mg) .....	3%
Cobalt (Co).....	0.004%
Iron (Fe) .....	5%
Manganese (Mn) .....	0.08%
Derived from Basalt	

### Also Contains Non-Plant Food Ingredients:

Silica (SiO <sub>2</sub> ) .....	22%
Derived from Basalt.	

### Soil Amending Active Ingredients:

Humic Acids .....	0.75%
Other Ingredients (Basalt). ....	99.25%
Derived from Lignite.	

### GENERAL APPLICATION

Apply at a rate of 30 pounds per acre to the soil. MagmaHume may be mixed with most granular applications or other dry products including animal manures. When applying as a mix with other granulated products, ensure even distribution by mixing thoroughly before application.
